

Fact Sheet

2016 SACE/NTCET university aggregate to ATAR conversion

SACE/NTCET university aggregate to ATAR conversion

Each year SATAC publishes tables showing the relationship between the SACE/NTCET university aggregate and the ATAR. This provides an accurate record of how the ATAR was ascribed to candidates in each year.

Students, teachers and parents/caregivers should note that prior year information cannot be used accurately to predict ATARs for students in future years. Students in particular should be wary of any advice that purports to do so.

The relationship between the university aggregate and the ATAR changes every year, depending on the population of 16 – 20 year olds in South Australia and the Northern Territory. For example, in 2015 an aggregate of 80.0/90.0 was awarded an ATAR of 95.20. Yet in 2016, an aggregate of 80.0/90.0 was awarded an ATAR of 94.75. In addition, the scaling outcomes for individual subjects changes from year to year, so it is not possible to predict the scaled score outcomes of studies in any year based on predicted A+ to E- SACE/NTCET grades.

SATAC is aware that there are websites that claim to contain "ATAR calculators". These do not accurately calculate ATARs for students.

SACE/NTCET university aggregate to ATAR conversion table
