

Work as One

We focus on strategic priorities

Our strategic priorities ensure the long-term success of SATAC and its stakeholders. We understand our priorities and commit to working together to achieve them. We think critically about how an activity is aligned with our strategy before committing to it.

We share our knowledge and expertise

We share our knowledge and expertise across organisational boundaries in the pursuit of common goals. Our individual roles and responsibilities are clear and we work together for the greater good, sharing accountability for key deliverables.

We encourage everyone to have a voice

We collaborate with each other and our stakeholders. We encourage listening to others, valuing different points of view and being open to new ideas and ways of thinking. In working together, we offer one another empathy and create space for the perspectives of others.

SATAC

Our people, our values
